**13.9M underserved eligible Americans skip their
no-cost lung cancer scan every year**

Total Eligible Patients: 14.5M

New Huge Market CMS Changed Guidelines February 2022

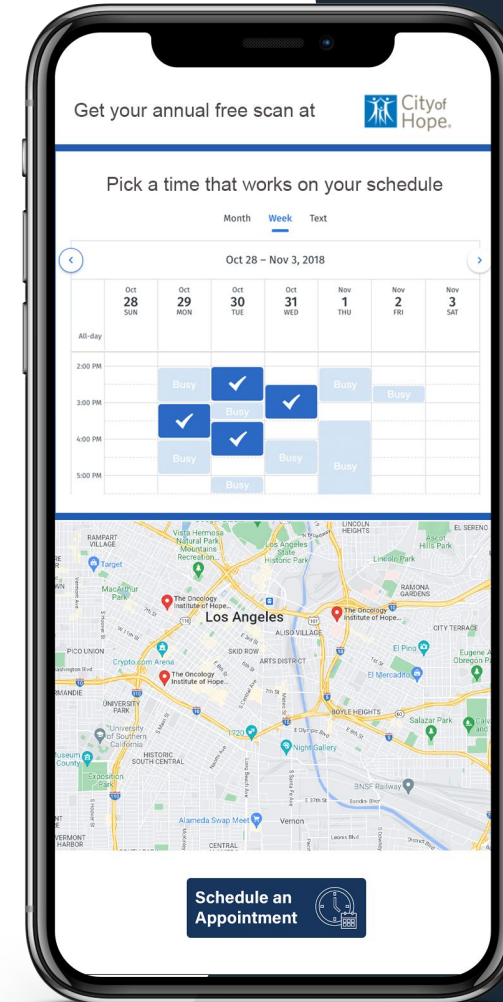

CMS Guidelines changed in February 2022 increasing eligibility to 14.5M lung cancer patients from 6.4M to help identify and treat patients sooner. We want to be the first to take on the challenge of using AI to save lives.

The Solution

oatmeal health

We find and scan underserved Americans and keep them coming back **year after year** with high-quality customer service

- Provide white-glove service to ensure repeat appointments
- AI Enabled Radiology Interpretation
- Accrue the **largest database** of images in the U.S. to develop new AI powered radiology solutions

Milestones and Traction
